VeroCor

COPPER CORROSION BATH

VeroCor

TECHNICAL PARAMETERS

Solid block bath for silver and copper corrosion testing per ASTM D7667/D130.

The solid block bath is specifically designed for measuring thin silver strip corrosion to ASTM D7667 and copper corrosion to ASTM D130.

FEATURES

- Two Groups of three sample positions, each group can work separately from the other group
- Aluminum Dry Block, with internal temperature monitoring sensors.
- Universal bathe with special inserts to accommodate different sample cups depends on the sample and test standard.
- Fast heating within 3 minutes to reach the test temperature.
- Maximum Temperature of 180 C
- Safety measures to avoid overheating are provided by the digitally controlled temperature setting secured by thermal semi-conductor devices

SPECIFICATIONS

Heating System	Aluminum Dry Block
Sample Positions	Six sample positions. each group of 3 has its separated monitoring and control system.
Power Consumption	Total power consumption is 1200 Wats. 600 Wats for each group.
Test Standards	Universal System to cover different test standards.
Power Requirement	220 V, 50 to 60 Hz
Weight	12 kg

APPLICABLE
